

# **Anticipatory Design Thinking research project- Highlights:**

## **Abstract:**

Research project by a consortium including universities, European municipalities and SME'S with consolidated expertise in social impact, to develop a new methodology combining techniques from Design Thinking and Anticipatory Sciences

## **Objectives**

- To produce guidelines for communication through academic documents
- To produce an ADT manual of best practices for consultants and scholars.
- To create an open on-line platform with the Best Practices identified along the project.
- Kick-off public events on Anticipatory Design Thinking with the participation of all partners
